

Mechanical/Aerospace Engineer
Avcon Industries, Inc.
Newton, KS

Employee Type:
Full-Time

Education:
4-Year Degree

Experience:
At least 3 years

Travel Required:
Limited

Job Description:

- Avcon is seeking an enthusiastic mechanical or aerospace engineer that will enjoy performing a variety of engineering duties for a small, dynamic company.
- The main objective of this position is to perform the duties of a staff mechanical engineer, including, but not limited to, design, aircraft modification, and liaison responsibilities.
- This position will be involved in preparing drawings and documents for aircraft repairs and project certification.
- This position will coordinate dispositions with stress, manufacturing, and the customer to design repairs.
- The engineer will function as a part of the Engineering Design Group and should be very familiar with common drafting practices using Solid Works and/or AutoCad and the design of aerospace parts.

Job Requirements:

- Bachelor's degree in Aerospace or Mechanical Engineering.
- Candidate should have a minimum of 2-3 years experience of aircraft industry experience, preferably in special mission or structural modifications, and be very familiar with aircraft structure and modification.
- Candidate must have commercial aircraft, business jet, or military aircraft structures design and drafting experience using AutoCad, Solid Works, or a similar design software.
- Excellent verbal and written communication skills are very important. Candidate must be team oriented and able to effectively communicate technical issues to the team and to management.
- MRB/Liaison experience is preferable.

Salary range will vary based on education and years of industry-related experience.
